C101
Factors that influence multi-cultural team integration on construction project teams
E.G. Ochieng & A.D.F. Price

C104
Privileges and attractions for private sector involvement in PPP projects – a comparison between mainland china and the Hong Kong special administrative region
Albert P.C. Chan, Patrick T.I. Lam, Daniel W.M. Chan, Esther Cheung & Yongjian Ke

C105
Identification of key competences of design-build clients in the construction market of the people's republic of china (PRC)
Bo Xia, Albert & P. C. Chan

C106
Construction information technology and a new age of enlightenment
P. S Brandon

C107a
Knowledge management (KM): integrating past experiences
A. Weippert & S. Kajewski

C107b
Managing innovation-driven change: ‘capitalizing on our most valuable and influential resource’
A. Weippert & S. Kajewski

C108
How to mitigate wind influence on motorways
A. Krecak Tomic & P. Sesar

C109
Precast concrete systems in developing vs. industrialized countries
G. Polat

C110
Life-cycle maintenance strategy development and decision-making model for street maintenance
A. Fastrich, G. Girmscheid

C112
Green energy and indoor technologies for smart buildings
F. Vranay, Z. Vranayova, D. Ocipova & D. Lukasik
**C113a**
Building environmental assessment tool  
S. Vilčeková, E. Krídlková Burdová & I. Šenitková

**C113b**
Indoor air quality, distribution systems, energy simulations  
R. Nagy & I. Šenitková

**C114a**
Building passive design and hotel energy efficiency  
B. Su & Q. Wang

**C114b**
Energy consumption related to winter housing thermal performance  
B. Su

**C116**
Success factors of strategic system service oriented cooperations – lessons for the construction industry  
D. Lunze & G. Girmscheid

**C123**
Prototype software for choosing appropriate type, size, number and time allocation of heavy equipment fleet in earthmoving projects  
Ehsan Forsatkar, Ali A. Jalalzadeh & Pooya A. Naderi

**C127**
Dey street tunnel project – the challenges of a design build project in a congested urban environment  
M. Trabold

**C128**
Challenges of a substation and infrastructure upgrade in an urban downtown setting  
M.L. Cochrane & C.D. Wagner

**C130**
How building information modeling has changed the MEP coordination process  
T. M. Korman, L. Simonian & E. Speidel

**C131**
Influence of construction costs on schedule performance  
J. A. Kuprenas
C132
Structural engineering and construction issues in the design of the Palmdale water reclamation plant expansion in Palmdale, Ca.
K. Monroe, J. Stanton, P. Wong & S. Maguin

C134b
Building information modeling (BIM): study of best practices and return-on-investment (roi) analysis
S. Azhar, S. Richter & R.U. Farooqui

C136
Personality types of civil engineers and their roles in team performance
Kamal Gautam & Amarjit Singh

C137
Technology projects and their impact on the engineering and construction process
Max M. Shoura

C138
CFRP liner quality control for repair of prestressed concrete cylinder pipe
A. Allan & H. Carr

C139
Structural sustainability of high performance buildings
Mir M. Ali & Philip G. Dimick

C141
Improving the MEP coordination process through information sharing and establishing trust
T.M.Korman

C144b
A comparative study on the use of alternative dispute resolution (ADR) to resolve construction dispute
Sai On Cheung, Peter S.P. Wong & Peter Kennedy

C145
A research framework to improve construction safety in the repair, maintenance, minor alteration and addition (RMAA) sector

C148
Configuration, evaluation and selection tool (CET) for tunnel construction methods
B. Schaiter & G. Girmscheid
C149
PPP-risk identification and allocation model (PPP-RIA-model): the crucial success factor for public private partnerships
T. Pohle & G. Girmscheid

C150
Development of a decision-making model for requirements management in building construction
N. Krönert & G. Girmscheid

C151
Maintenance life cycle cost model – prediction of the life cycle costs of different maintenance strategies for drainage systems of infrastructures
T. Gamisch & G. Girmscheid

C152
Open building manufacture systems: a new era for collaboration?
M. D. Sharp & J.S. Goulding

C153
Gendered behavior: cultures in UK engineering and construction organizations
Barbara Bagilhole

C155a
Conservation projects management by the architectural digital photogrammetry and GIS
F. Navarro, A.L. Rodríguez, V. Ávila & C. Loch.

C156a
Underlying mechanisms of failure costs in construction
J. E. Avendano Castillo, S. H. Al-jibouri & J. I. M. Halman

C156b
An interactive model for reduction of failure costs: a process management approach
J. E. Avendano Castillo, S. H. Al-jibouri & J. I. M. Halman

C157
Behaviors of leadership in architectural offices in turkey
E. Kasapoğlu

C159b
A survey of the current I-build practices in the Taiwanese construction industry
H. J. Chien, J. R. Chang & H. W. Chien

C163
Use of analytical hierarchy process technique for delay claims in construction contracts
N.B. Chaphalkar & K.C. Iyer
C164
Active pier underpinning of Jin-Bin light rail bridge in Tianjin
Jianqing Bu, Ning Sun & Siyong Huang

C165
Macroeconomic costs within the life-cycle of bridges
T. Zinke, T. Wachholz & T. Ummelhofer

C166b
Materials waste minimization strategies in Nigerian construction projects: rate of use and their contributions.
O. J. Oladiran

C169
Fuzzy logic based diagnostic tool for management of timber bridges
S. Ranjith, S. Setunge, S Venkatesan & R. Gravina

C170a
Quantifying measurement of successful project performance – a project manager’s perspective
R.U. Farooqui & S.M. Ahmed

C171
Rapid transport system is an important infrastructure for urbanization: a case study.
S. K. Das

C172a
Developing a document management model for resolving contract disputes for contractor
J.-B. Yang, & K.-M. Huang

C172b
Determining schedule delay causes for private participating public construction works under the build-operate-transfer model in Taiwan
J.-B. Yang & C.-C. Yang

C173
Forecasting low cost housing demand in urban area in Malaysia using artificial neural networks (ANN)
Noor Yasmin Bt Zainun, & Mahroo Eftekhari

C174
Value engineering and its applications in construction industry
V.S.S. Kumar, R Ramesh Reddy & Anu Leena Y.
Construction of concrete embedded track, direct fixation track, ballasted track, low vibration track, and special track work
Kenneth H. Dunne, Kit Wong & Nick Slama

An anatomy of speculative claims in construction
Hoi Yan Pang & Sai On Cheung

Causes of delay in Iran construction projects
Ehsan Asnaashari, Andrew Knight & Alan Hurst

Genetic algorithm-based multi-objective design model for reinforced concrete beams
A. Senouci & N. Al-Nuaimi

Tall building boom - now bust?
I. R. Skelton, D. Bouchlaghem & P. Demian

Business model: a two-dimensional cooperation network for successful market penetration with prefabricated concrete elements and systems
T. Rinas & G. Girmscheid

Formwork specific, process orientated geometrical-path-velocity-time-model (Gpvt-model)
M. Kersting & G. Girmscheid

Organizational e-readiness in the built environment: people, process, technology
E.C.W. Lou & J.S. Goulding

Designing the relationship between contractor and client to partnership
Konrad Spang

Innovative precasting of 41-storey residential buildings in Hong Kong public housing

Trend analysis of cost performance for public work projects
Pramen P. Shrestha & Leslie Burns
Designers’ role in the shaping of innovative and adaptable building system – a preliminary study
T. O. Odeyale

Construction productivity and production rates: developing countries
C.R. Guntuk & E. Koehn

Builders’ perceptions of the impact of procurement method on project quality
S. Saha & M. Hardie

Smoothing methodology for time series data
F. Khosrowshahi

CIVIL ENGINEERING MATERIALS

Influence of admixtures on performance of roller compacted concrete
P. Hafiz & A.R. Khaloo

Textile reinforced concrete structures computational models and applications
W. Graf, M. Kaliske, A. Hoffmann, J.-U. Sickert & F. Steinigen

Precast ferrocement barrel shell planks as low cost roof
S.F. Ahmad

Properties of the nature-fiber cement boards for building-compartments
Y. W. Liu & H. H. Pan

Suitability of some Ghanaian mineral admixtures for masonry mortar formulation
M. Bediako, E. Atiemo, S.K.Y Gawu & A.A Adjaotor

Use of bamboo composites as structural members in building construction
T.H. Nguyen, T. Shehab & A. Nowroozi
M111
Microstructural transformations on quenched & tempered steel welds
Severino Missori

M112a
Moisture permeability and sorption-desorption isotherms of some porous building materials
R. Miniotaite

M112b
Climatic effects on building facades
R. Miniotaite

M113
Influence of rice husk ash on strength and durability of binary and ternary blended concrete
H.B. Mahmud, M.F.B.A Malik, N.B.A.A. Hamid & M.F.M. Zain

M114
Green materials to offset seismic and other natural disaster events
B.O. Russell

M115
Use of polystyrene as a construction material in thermal insulation of concrete structure
H.R. MagarPatil & B.S Kakare

M116
Theoretical analysis of tensile stresses in orthotropic specimens under diametral compression tests
H. Iwashita & T. Tsutsumi

M117
Ultra light-weight self consolidating concrete
M. Hubertova & R. Hela

M121
Experimental research on regional confined concrete columns under concentric and eccentric compression
X.M. Cao, J.C. Xiao, Z.H. Huang & T.J. Ren

M122a
Concrete deterioration under alternant action of carbonation and sulfate attack
R. Gao, Q. Li & S. Zhao

M123
Numerical simulation of fracture propagation of concrete on Meso-level
Wu Feng & Zhuo Jiashou
M125a
Flexural behavior of high strength stone dust concrete
V. Bhikshma, R. Kishore & Mr.N.H.M. Raju

M125b
Investigations on flexural behavior of high strength manufactured sand concrete
V. Bhikshma, R. Kishore & C.V. Raghu Pathi

M129
Estimation of marine salt behavior around the bridge section
E. Iwasaki & M. Nagai

M130
Effects of bamboo material on strength characteristics of calcium-based mortar
H. Kawamura, K. Hashimoto & A. Shimabukuro

M131
On characteristics of bamboo as structural materials
T. Tada, K. Hashimoto & A. Shimabukuro

M132
Research into the optimum level of rock-derived micro-fine particles in sand for concrete
T. Kaya & K. Hashimoto & H. Yamamoto

M133
Basic study on physical property for Calcium-solidification material and on Ca-based concrete
A. Shimabukuro & K. Hashimoto

M135
Strength, sorptivity and carbonation in blended OPC-GGBS, alkali activated slag, and fly ash based geopolymer concrete
A. A. Adam, T. C. K. Molyneaux, I. Patnaikuni & D. W. Law

M136
Effects of remediation and hauling on the air void stability of self-consolidating concrete
N. Ghafoori & M. Barfield

M137
Nested ANOVA model applied to evaluate variability of ready-mixed concrete production
C. Videla & C. Imbarack

M139
Experimental study on Young’s modulus of new-material-mixed cementitious extrusion-molded materials
Tsugumichi Watanabe & Akiko Mori
M140  
Strength property of concrete using the recycled aggregate and a high volume of fly ash as a part of the fine aggregate  
Takahide Ishiyama, Koji Takasu & Yasunori Matsufuji

M141  
Correlations between filler type and the self compacted concrete properties  
M. Gheorghe, N. Saca & L. Radu

M142  
Experimental study on dry-shrinkage of lightweight cement mortar with considerations on finish plastering conditions  
Tsugumichi Watanabe & Akiko Mori

M143  
Bond studies of hooked bar anchorages confined with steel fibers in normal strength concrete  
B.S. Hamad & E.Y. Abou Haidar

M147  
The non-local theories based on different types of weighted functions and its application  
Qing Yang & Zhong-chang Wang

M148  
A laboratory investigation to prove the roll of pozzolan in permeability of RCC and its important result on dam construction industry  
R. Esmaeil Abadai & S. Shahrabi Farahani

M149  
Investigation the effect of aggregate on the performance of permeable concrete  
C. Lian & Y. Zhuge

M150  
Early life freeze/thaw tests on concrete with varying types of fiber content.  
A. E. Richardson & S Wilkinson.

M151  
Evolution of Portland cement pervious concrete construction  
J.T. Kevern & Leed AP

M152  
Reinforcement corrosion and durability of concrete structures  
A. Aritra Khan & B. Ashok Kumar Khan
M153
Studies on glass fiber reinforced concrete composites – strength and behaviour
B.L.P. Swami, A.K. Asthana & Urooj Masood

M154
Hemp – rediscovered building raw material
Filip Khestl

M155
Measurement of attenuation for photons and removal cross-section for neutrons in LMC

STRUCTURAL ENGINEERING

S103
Study on the seismic behaviour of cable-stayed bridge based on FEM model
Dongming Yan & Genda Chen

S105
Wood use in type I and II (noncombustible) construction
D.G. Bueche

S108
Sequential failure analysis of tension braced MRFs
Mehrdad Lotfollahi & Mohammad Mehdi Alinia

S109
Effect of infill walls in structural response of RC buildings
I. Idrizi, N. Idrizi, Z. Idrizi, S. Idrizi & I. Idrizi

S110
Performance based analysis of RBS steel frames
P. Alexa & Ioana Ladar

S111
Numerical study on strengthening composite bridges, compare between applying steel sheets and HM-CFRP strips
K. Narmashiri & M.Z. Jumaat

S112
Seismic behavior of RC framed buildings with soft ground story
K.M. Amanat & S. Haque
Response of long concrete structures in plan in seismic active regions
A. Zerzour & F. Belabelouahab

The optimization of the industrial steel building
T. Žula & S. Kravanja

The MINLP approach to structural synthesis
S. Kravanja

Applicability of AASHTO LRFD live load distribution factors for nonstandard truck load
Yail J. Kim, Rusmir Tanovic & R. Gordon Wight

Finite element analysis of wind induced buckling of steel tank
S. Borgersen

Correlation between minimum building strength and the response modification factor
L.G. Daza

Finite element analysis of link slabs for jointless bridge decks
A.R. Aleti, A. Saber, G. Li & W. Alaywan

Nonlinear finite element analysis of unbonded post-tensioned concrete beams
U. Kim, P. R. Chakrabarti & J. H. Choi

Identification of frequency dependency of quality factor in subsurface ground using vertical array records of earthquake motions
O. Tsuijihara

Prefabricated planar structure of a multi-storey building exposed to cyclic load and engineering seismicity
J. Witzany, T. Čejka & R. Zigler

Structural behaviour of reinforced palm kernel shell foamed concrete beams
U. Johnson Alengaram, Mohd Zamin Jumaat & Hilmi Mahmud
S141  
Modeling the steps of structure failure in the seismic load  
H. Fathi

S146  
Relationship between strength of prefabricated scaffolds and shear rigidity of vertical and horizontal frames  
H. Takahashi, K. Ohdo & S. Takanashi

S147a  
Experimental investigation of FRP wrapped RC circular and square hollow columns  
M.N.S. Hadi & Y. Kusumawardaningsih

S147b  
Behaviour of frp wrapped circular reinforced concrete columns  
M.N.S. Hadi & V. Yazici

S148  
Practical non-prismatic stiffness matrix for haunched-rafter pitched-roof steel portal frames  
H. K. Issa & F. A. Mohammad

S150  
Structural behavior of steel frame connections subjected to blast  
G.S. Urgessa & T. Arciszewski

S151  
Adaptive behavior of double concave friction pendulum bearing and its advantageous over friction pendulum systems  
M. Malekzadeh & T. Taghikany

S152  
Estimation of statically equivalent seismic forces of single layer reticular domes  
H. Abdolpour, Z. Zamanzadeh & A. Behravesh

S155a  
Three-dimensional displacement computation and construction pre-control of foundation pit in Deping Station of Shanghai Track Traffic Line 6 project  
Youliang Chen, Zhenzhen Yin, Junhua Wu & Ming Wang

S155b  
Experimental research on high-frequency fatigue behavior of concrete  
Youliang Chen, Wei Shao, Hongjuan Han, Rafig Azzam & Zhenzhen Yin

S156  
Torsional resistance of confined brick masonry panel  
Pramod Kumar Singh
Innovative tool for predicting slab deflections at conceptual stage of design
Vinay Agrawal, Ravindra Nagar & Vinay Chandwani

Crack arrest strip-saturation model for a cracked piezoelectric strip
R. R. Bhargava & Amit Setia

Strengths of unconfined and confined brick masonry buildings under seismic load
Pramod Kumar Singh

Soil structure interaction analysis of plane frames using fem
Dr. Harpal Singh

A note on the model based on the constant Q damping assumption and its corrected models
A. Susumu Takahashi

Experimental study for development self-centering RC structural frames with column yielding mechanism
K. Sakino & H. Nakahara

A study on a neural-oscillator model for human-induced lateral vibration on congested footbridge
M. Yoneda

Calculation method research on the flexural capacity of prestressed steel reinforced concrete beam
A. Qin Shihong, B. Wang Yuan, Li Feng & C. Ding Zhichao

Comparison of seismic safety of steel MRF designed according to different editions of Iranian seismic code
K. Nasserasadi

Mitigation of high acceleration shock waves in hybrid structures
S. G. Ladhany & S. Sueki

Elastic-plastic bending load-carrying capacity of steel members
P. Juhás
S169b
Experimental research of local elastic-plastic stability and load-carrying capacity of thin-walled steel members subjected to compression
P. Juhás, M. Al Ali & Z. Kokoruňová

S170
Strengthening a concrete slab bridge using CFRP composites
S. H. Petro, J. T. Peaslee & T. G. Leech

S171
Modeling of concrete beams prestressed with aramid fiber reinforced polymer (AFRP) tendons
Yail J. Kim

S172
Contribution of NSM CFRP bars in shear strengthening of concrete members
AKM Anwarul Islam

S173
Effect of shear lug on anchor bolt tension in a column base plate
P.K. Khan

S174
Repair systems for two-way and one-way un-bonded post-tensioned slabs with composite materials
P.R. Chakrabarti, U. Kim, Mark Busciano & Vin Dao

S176
A new composite layered plate element for nonlinear analysis of FRP-reinforced concrete slabs
Y.X. Zhang & Y. Zhu

S177
Experimental study of reinforced concrete slab – CFT column connections resisting seismic deformations
Youpo Su & Ying Tian

S178
An experimental study on double steel-concrete composite beam specimens
S.J.Duan, Q.D.Zhou & J.W.Wang

S180b
Tensile-anchorage bearing modes and structural details of annular high-performance prestressed concrete structures
F. Li & S. Zhao
Ultimate strength of stiffened composite plates under inplane and out-of-plane loading  
Rahima Shabeen. S & Alagusundaramoorthy. P

Strengthening effect of consolidated carbon fiber plate (CCFP) for RC member under negative bending  
I. Yoshitake, K. Yumikura, Y. Mimura & S. Hamada

Behavior of cylindrical R/C panel under combined axial and lateral load  
T. Hara

Shear strength and deformation prediction in steel fiber reinforced concrete beams without stirrups  
T. Nyomboi & H. Matsuda

Punching shear strength of RC slabs using lightweight concrete  
H. Higashiyama, M. Mizukoshi & S. Matsui

Shear crack width of reinforced concrete column with cut-off reinforcement subjected to reversed cyclic loading  
T. Tsubaki, M. Dragoi & J. Onishi

Experimental study on high strength R/C member subjected to axial tensile force and shear  
Takahiro Tamura

Investigating the buckling behaviour of single layer dome form of space structures  
Z. Zamanzadeh, H. Abdolpour & A. Behravesh

integrated design and construction to mitigate wind-induced motions of tall buildings  
K. Moon

Full scale test on a bridge PC box girder  
C. Mircea, A. Ioani & Z. Kiss
S194a
Evaluating shear capacity of interior beam-column joints subjected to cyclic loading using neural networks
A. Said & E. Khalifa

S194c
Comparison of different standards for progressive collapse evaluation procedures at various seismic conditions
A. Saad, A. Said & Y. Tian

S198
A study of the evolution of steel-concrete adherence capacity under dynamic fatigue processes
M. A. Vicente, D. C, González & J. A. Martínez

S199b
Seismic Hazard Assessment of Bandar Abbas for Seismic Retrofitting
G. Ghodrati Amiri, S.A. Razavian Amrei & B. Mohebi

S199c
Deterioration effect in reinforced concrete moment frames in pushover analysis
G. Ghodrati Amiri, B. Mohebi & S.A. Razavian Amrei

S199d
Evaluation of drift distribution in performance-based retrofitting reinforced concrete frames using steel bracing
G. Ghodrati Amiri & A. Gholamrezatabar

S199e
Effect of transverse reinforcing on circular columns confined with FRP
Gh. Ghodrati Amiri, A. Jaberi Jahromi & B. Mohebi

S200
Non-deterministic modeling of a cable-stayed bridge with multiple uncertainties
R. Ramesh Reddy, M.V.Rama Rao & V.S.S.Kumar

S202
Shape optimization of shell structures with variable thickness
M. Kegl, B. Brank & D. Dinevski

S205
Reasoning on structural timber design for target reliability
L. Ozola

S206
A finite element model for double composite beam
D. Shujin, N. Runming, J. XU & H. Zheng
Application of nonlinear damper in reinforced concrete structure control
F. Hejazi, J. Noorzaei & M. S. Jaafar

Seismic analysis of interlocking block in wall – foundation – soil system
M. S. Jaafar, F. Hejazi, A. A. Abang Ali & J. Noorzaei

Estimate & processing of earthquake damages by optical satellite images
M. H. M. Tabrizi

Long-term deflections of long-span bridges
J. Navrátil & M. Zich

Behavior of fiber reinforced concrete beams on grade subject to cyclic loading
M.A. Briggs & A.J. Valsangkar

Mitigation of seismic effects: addition of viscous dampers between adjacent structures
S. Silvestri, G. Gasparini & T. Trombetti

Investigations of the dynamic state of turbo sets foundations
A.O. Kolesnikov, V.N. Popov & O.M. Kolesnikov

Study up nonlinearity in the data from transient load identification
Y.G. Wang

Analysis of Large Dynamic Structures in the Entertainment Industry
D. P. Cook & R. T. Robinson

A revised BESO method for topology optimization of structures with design-dependent gravity loads
X. Huang & Y.M. Xie
GEOTECHNICAL AND FOUNDATION ENGINEERING

G102
Model tests on bearing capacity of soil-bags
H. Yamamoto & S. Jin

G104
Large scale experimentation slope stability of «Soil Tyre »
F. Belabelouahab & A. Zerzour

G105
Estimating rock mass properties and adapting tunnel support from in situ measurements during tunneling construction
Ioannis Z Spyropoulos

G106
Bearing capacity factor for cohesion-less sand or rock
R. V. Jarquio

G107
Dynamic effects of machines on foundations buildings
J. Vondrich & E. Thöndel
